Explain what mitigation will be used at the site. Attach additional pages if necessary.
 Low-noise methods - Using hydraulic shears instead of jackhammers when possible.
 Noise barriers - Temporary plywood walls, sound blankets, or acoustic curtains around the site.
 Limited work hours - Following NYC Noise Code (generally 7 AM-6 PM on weekdays unless permitted)
 Equipment controls - Using newer, quieter machinery and properly maintained mufflers.

CONSTRUCTION DEVICES

List of §1102 construction devices to be used at the site. When the additional devices listed below each category are utilized, the use of barriers as set forth in section IV herein is not required unless the NYC Department of Environmental Protection receives complaints as set forth in §28-102(c) of Title 15 of the RCNY for each device. If however, the specific devices listed below each main category of devices are not checked, and you are using any of the main devices listed below, then the use of barriers set forth in Section IV herein shall be utilized. However, if you specified "other" in a category, you shall be required to utilize barriers as set forth in Section IV herein.
